Beginning a New Era

Welcome to Par-Kut International - manufacturers of quality, portable steel special purpose enclosures for over 50 years. Since 1954, family owned Par-Kut International has been committed to providing virtually every industry with the safest, most attractive and durable booths available. In the early fifties, the Detroit based company was named Par-Kut as only parking huts were manufactured at that time. From the early days until well into the 1970's, the firms full name was Par-Kut Engineering and Fabricating. Although still descriptive of the activities today, the original name was changed to Par-Kut International due to market expansion to other countries as well as throughout the United States.

Par-Kut booths have served at governmental, military, educational and medical institutions, as well as the private sector's industrial and commercial concerns. From parking attendant buildings to bullet resistant, high security enclosures to public transport waiting shelters - we've built them all . . . and we've built them well.

Quality, long-lasting materials, uncompromising workmanship and innovative design solutions have earned Par-Kut the reputation of "front-runner" in the portable steel building arena. This is evidenced by the high rate of referrals and repeat orders placed on a regular basis.

The 50 Year Anniversary of Par-Kut International approaches the product line from a new perspective. The second half of our new 32 page catalog allows a close-up look at examples and features of booths in specific areas of "application". This section will show Par-Kut buildings where they are most commonly seen as well as the more unique usage. Throughout the past years, Par-Kut International has continuously met or surpassed all current EPA manufacturing requirements. Consequently, we've remained stewards for a healthy environment. Most recently, Par-Kut has contributed to and remained involved in the efforts of Homeland Security. Our employees enjoy the benefits of an equitable workplace.

Thanks to our customers, vendors and employees, Par-Kut International has enjoyed 50 years of growth and profit-ability. We have thrived in a free enterprise system that we strongly support, and gained acknowledgment as a major supplier in the prefabricated steel building industry.

We now look forward to the next 50 years.

Quality Construction Producing Industrial Strength

Par-Kut portable steel buildings are overbuilt! They repeatedly outlast other types and brands of portable buildings. The reason is uncompromising workmanship and the use of top quality, low maintenance materials. For over fifty years, each Par-Kut has been built one at a time - with attention given to every detail. And a Par-Kut portable steel building is as attractive as it is long lasting.

Beginning with the strength of the welded galvanized steel frame and wall panels, Par-Kut craftsmen finish all joint seams to ensure each booth is both attractive and weather resistant. Rust-inhibiting epoxy primers and acrylic epoxy topcoats guarantee that Par-Kut buildings will maintain luster and good looks for years and years. Insulation, heating/cooling systems and UL approved electrical are all installed by qualified tradesmen and electricians.

Various exterior wall treatments, veneers, brick and specialized roof applications are available to further customize your booth and it's appearance. A long list of options and features may be added to enhance comfort, convenience and safety.

We customize your Par-Kut booth to meet your requirements - regardless of the location. The last step is to seal, weatherstrip and finish each Par-Kut building to maintain interior comfort and keep inclement weather out.

Throughout production and upon completion, every building is inspected in accord with a 35 point quality control check. At Par-Kut International, we're determined to deliver the most attractive, safest and highest quality steel building available - and do it on time!

PAR-KUT

STANDARD

STD-001

The versatile Standard PAR-KUT® portable steel building fits a wide range of applications and virtually every budget. The Standard PAR-KUT® booth is the foundation of our business.

Basic, Long Lasting Quality

Basic but not "sub-standard" by any means, versatility best defines the Standard PAR-KUT brand portable steel building. It boasts the same all-welded construction found in every Par-Kut booth. The Standard is available in sizes ranging from 3'x 5' to 10'x 20' and up. Regardless of size, all utilize heavy gauge materials to last indefinitely, and meticulous workmanship is put into every Standard built.

The simple, straight-forward design of the PAR-KUT Standard enables usage in a wide range of applications. This booth is seen in industrial, commercial and government applications everywhere. An endless list of options are available for you to customize your Standard. The Standard design is especially conducive to adding restrooms, stand or trailer mounts, ADA compliant features and bullet resistant construction. As a leader in the industry for setting the criteria for durability, the PAR-KUT Standard is far from standard.

PAR-KUT

PRESIDENTIAL

PREZ-001

As the latest addition to the Par-Kut architectural product line, the PRESIDENTIAL offers a unique flair to traditional styling. We are constantly striving to bring innovative yet functional design ideas to the production floor.

Traditional Styling in Steel

The elegant, yet durable PRESIDENTIAL is the most frequently requested Par-Kut architectural design since it's introduction in 1992. Built to order, the attractive PRESIDENTIAL is ideal for the application where visual first impressions are critical. This model is supported by durable Par-Kut welded construction and uncompromising workmanship.

The standing seam metal hip roof best defines a Par-Kut PRESIDENTIAL. Add raised rib exterior wall panels and base trim, colonial style window mullions, steel door(s), crown moldings or premium 20 year pre-finished Kynar type or copper roof for added elegance. Appearance upgrades may also include roof top finials, tinted glass and two-tone paint.

With your specifications, Par-Kut will provide the focal point with one our our stately PRESIDENTIAL buildings.

PAR-KUT

PARVUE®

PAR-001

Crisp, clean, architectural lines and the glass-to-glass corners of the PARVUE equal an eye-pleasing design that proves it's functionality in a wide range of applications. The wrap around glazing provides 360° visibility for enhanced security.

Innovative, Durable, Functional

As the innovator of functional design, Par-Kut produces the PARVUE featuring butt glazed glass to glass corners. This feature maximizes light and results in an open interior. With 360 degree visibility, the PARVUE is the solution for high visibility locations where the objective is to "see and be seen".

The attractive wrap around glazing extends fully to the soffit, eliminating the header above the glass, providing the PARVUE with a clean contemporary look. A stylish 12" single fascia is standard or specify a 25" double stacked fascia to conceal roof top utilities and complement PARVUE's clean design. As with every Par-Kut portable building, quality materials and workmanship combine for a long service life. The practical PARVUE is available in sizes 3' x 6' and larger. Options are endless, making this booth an ideal fit for any industry or application.

Par-Kut's innovative PARVUE proves that form and function can exist in the same steel building.

PAR-KUT

CURVUE

CRV-001

The ever-popular rounded end construction of the CURVUE provides an attractive complement to any contemporary setting. Rounded ends make for a very "roomy" feel to the CURVUE's interior.

Strength, Styling, Durability

The unique rounded end design of CURVUE has influenced steel building manufacturers for years. However, unlike many other manufacturers, Par-Kut maintains CURVUE's structural integrity throughout the booth design. Each booth is over-built and reflects Par-Kut's extensive experience and knowledge of welding and fabricating technology. In addition to roll formed ends, wrap-around windows complement the booth while providing integral strength and improved visibility. Steel wall construction allows for simple field installation of equipment.

Applications for the CURVUE are unlimited. Standard sizes include 4' x 8', 5' x 9', 5' x 10' and 5' x 12'. Alternative size configurations and half round models are available for special design requirements.

CURVUE's rugged construction is shadowed only by it's aesthetically pleasing lines. Imitated, but not duplicated, the Par-Kut CURVUE combines strength, durability and good looks - all in one booth.

PAR-KUT

CENTRY

CEN-001

The CENTRY features radius cornered construction and is a long time favorite. It provides an attractive diversion from the rectangular look of conventional booths.

Proven & Stylish Alternative

As one of the earliest Par-Kut design upgrades, the CENTRY offers a refreshing alternative to the rectangular look of conventional booths. Modest radius corners add a classic flair while providing a more spacious interior than a fully rounded design. Windows may be square cut or radius cornered - adding to the eye-pleasing appearance of the CENTRY.

Standard features include a top hung steel door with hook bolt lock as well as the radius corner canopy. As with all Par-Kut buildings, an extensive option list will customize the CENTRY to accommodate any specific purpose or setting. Sizes range from 3'x 6' to 8' x 16', but the CENTRY may be built to any dimension requested.

Every CENTRY is built Par-Kut tough to withstand years of abuse regardless the environment. The Par-Kut tradition continues with the design-practical CENTRY - standing guard with quality and good looks.

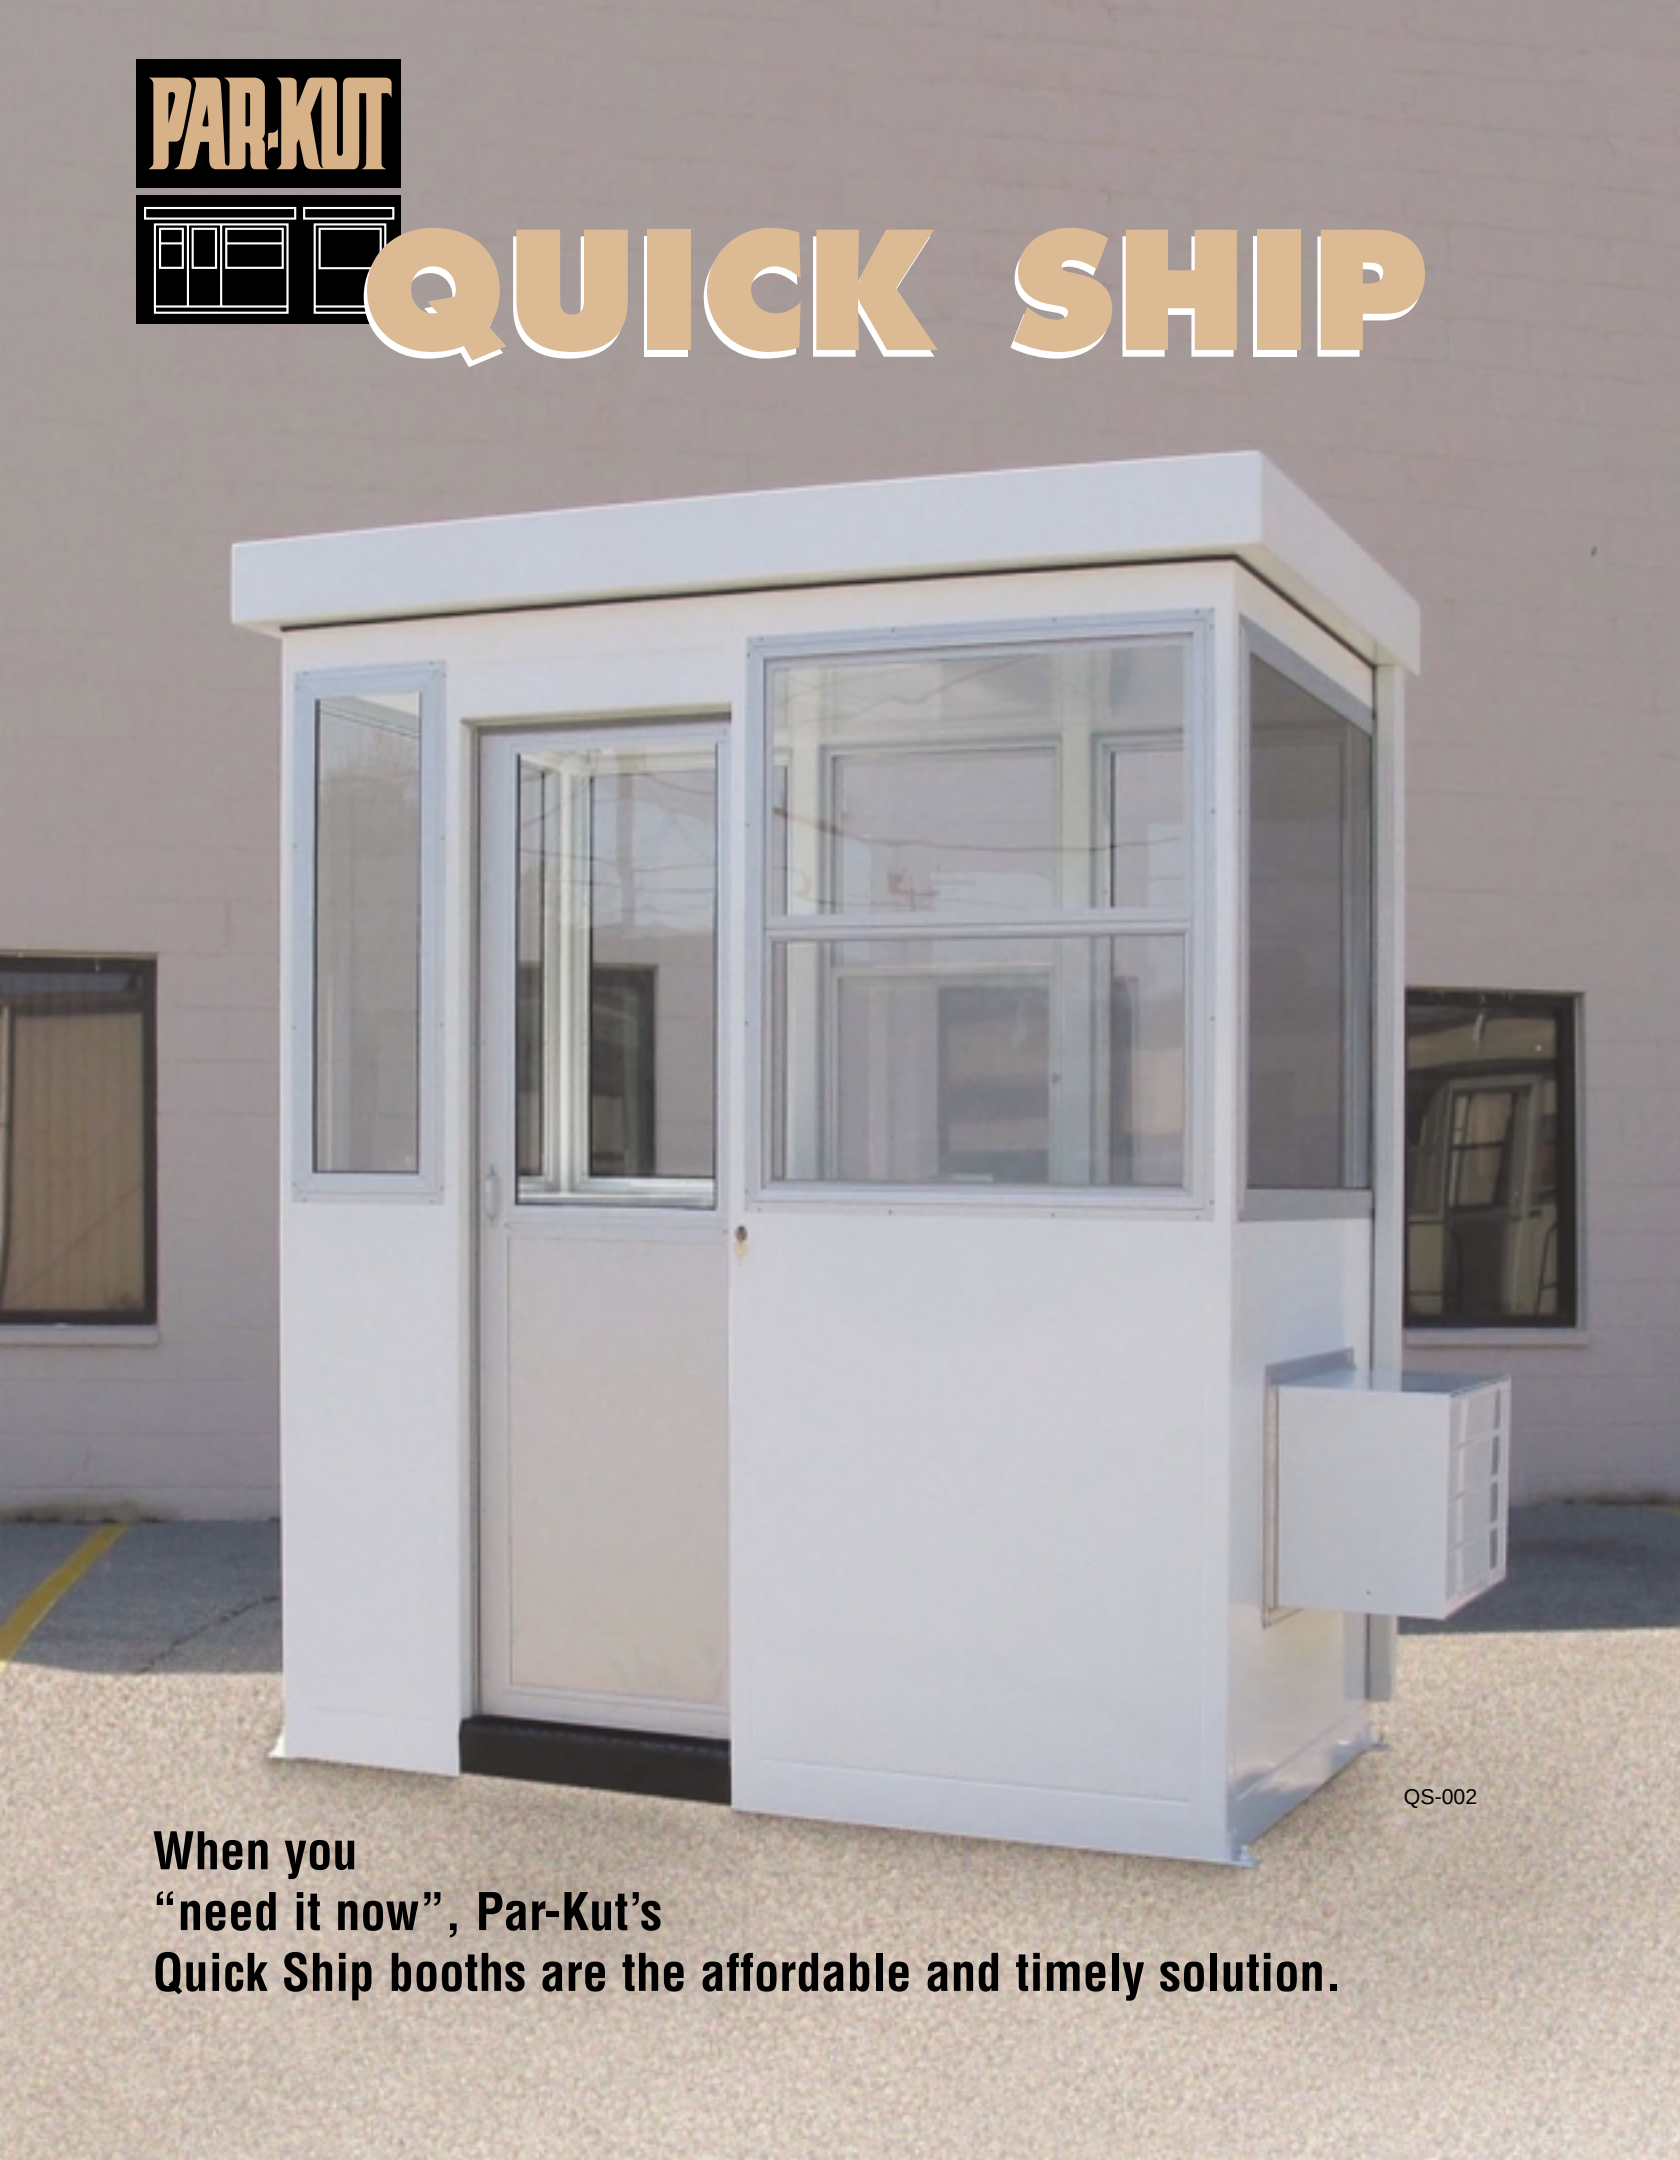
PAR-KUT

QUICK SHIP



QS-002

When you
“need it now”, Par-Kut’s
Quick Ship booths are the affordable and timely solution.

Just in Time Delivery

Without compromise, Par-Kut's Quick Ship booth program is the solution to the immediate requirement for basic steel buildings of top quality construction. Quick Ship booths are built to Par-Kut's exacting criteria, using the same high quality materials and uncompromising craftsmanship evident in every Par-Kut model. These buildings have been fabricated and warehoused to be finished at time of customer order.

Booths are available in sizes 4'x 6', 4'x 7', 6'x 8' and the smallest 3" x 4'2". Each Quick Ship booth is painted one of five colors, finished and expedited to the designated site. Although lead times will vary with factory backlog, most booths in this program can be ready for shipment in 3-5 weeks, sometimes sooner. Options are limited to tinted glass, sliding transaction window, additional duplex outlets, and air-conditioning and heater upgrades.

Before it's needed, Par-Kut's Quick Ship is already ready.

application: SECURITY

SEC-001

Par-Kut builds the safest and most secure gate houses, guard shelters, inspection booths and security checkpoints. We've provided top quality security buildings to the government, private industry, airports and the U.S. military, at home and around the world.

Serious about Security

Par-Kut International plays a significant role in providing security buildings and guard shelters to airports, private industry, commercial, industrial, government and the U.S. military throughout America and around the globe. Because Par-Kut portable steel buildings are built to withstand years of physical and environmental abuse, they are the logical choice when choosing gate houses, dock shelters, sally ports, perimeter check points, inspection booths and gun or surveillance towers.

In addition to options available on all Par-Kut booths, special security features are offered to keep personnel comfortable, as well as secure. A partial list of options includes reflective glass, gun portals, security screens, intercoms, sliding windows, exterior lighting, dimmable interior lights, and bullet resistant construction to UL 752, Level 8. As a crucial aspect of today's security systems, Par-Kut has made bullet resistant fabrication a priority.

With hundreds of models and sizes available, there's sure to be a Par-Kut building to fit every security application.

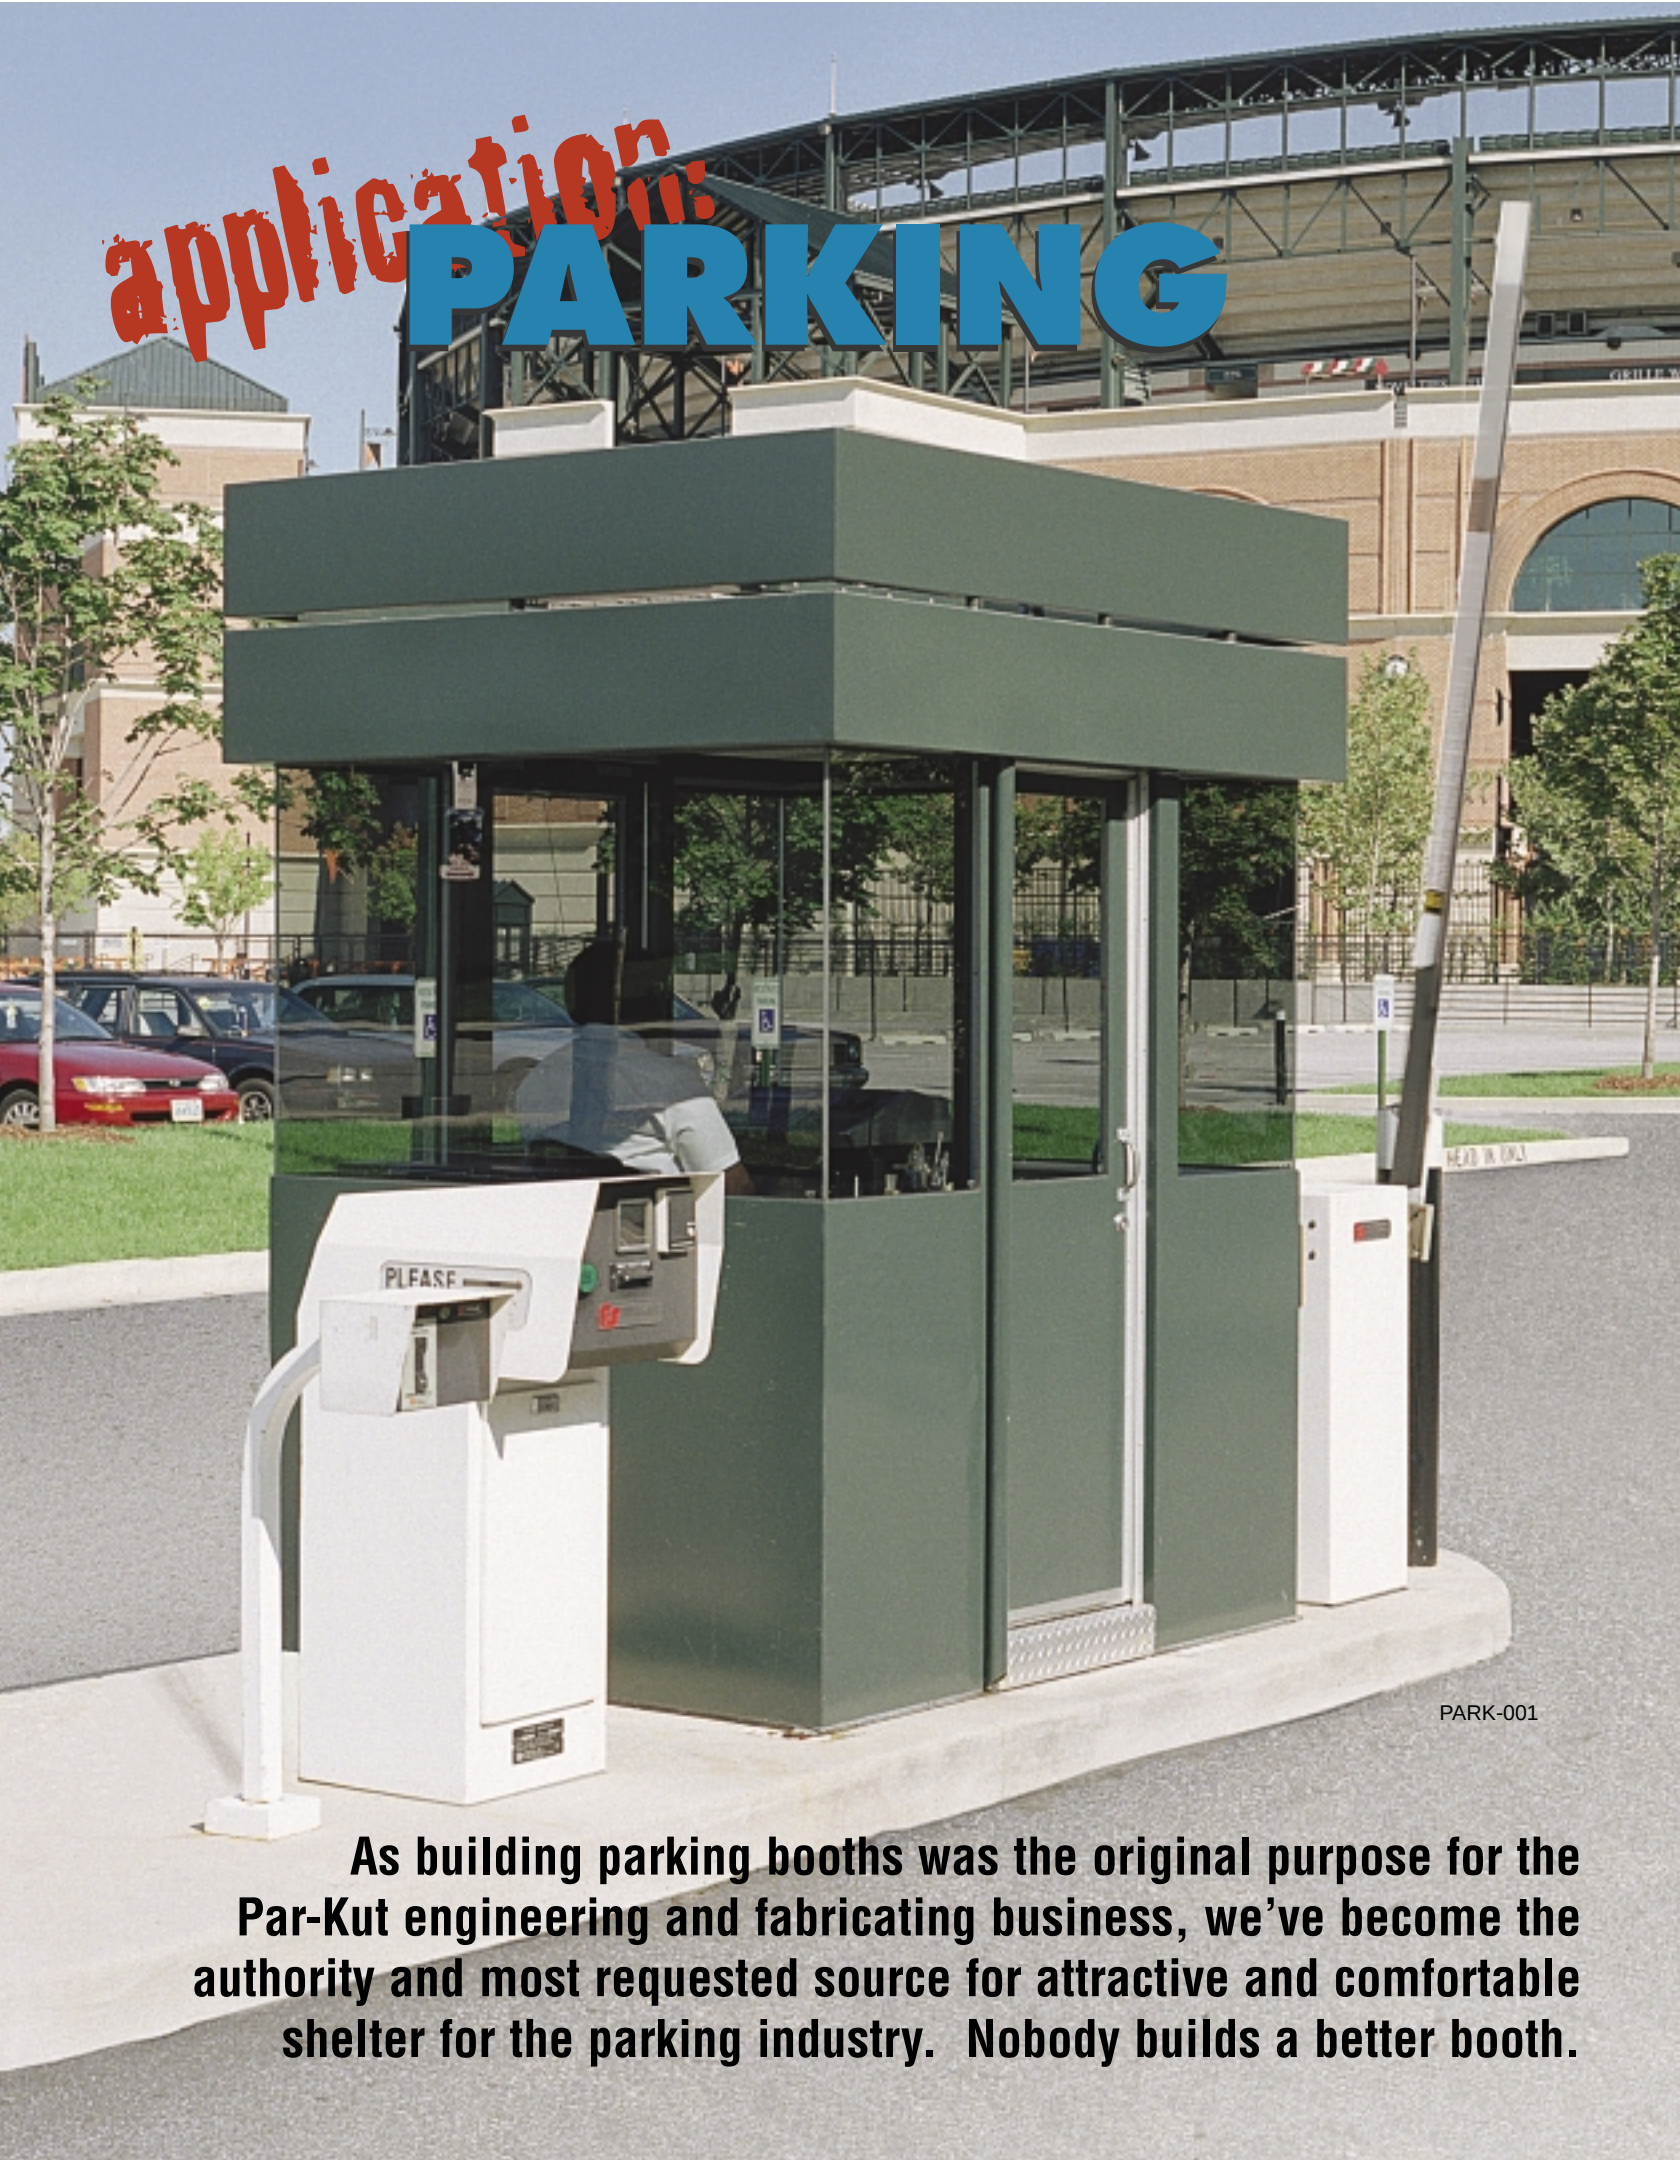
application: PARKING



PARK-001

As building parking booths was the original purpose for the Par-Kut engineering and fabricating business, we've become the authority and most requested source for attractive and comfortable shelter for the parking industry. Nobody builds a better booth.

Making Parking a Priority

As the company's "First Industry", Par-Kut (short for Parking Hut) has been building quality parking booths since 1954. From single unit commercial structures to airport plazas and municipal parking facilities, Par-Kut has built them all.

The parking environment is often an extreme one, subjecting booths to harsh weather, physical abuse and neglect. A Par-Kut portable steel building withstands all adversity and remains looking good and in service for up to 25 years. Par-Kut knows how to make a building last.

One reason is low maintenance materials that resist deterioration. Another is uncompromising craftsmen fabricating over-built booths from heavy duty materials. Comfort and convenience features include countertops and cashier windows at 32" above floor level, transaction drawers and intercoms, tinted glass, additional insulation and climate control equipment. All make the value of a Par-Kut parking shelter unbeatable.

The parking booth industry is a tough niche in which to excel. But, that's exactly what Par-Kut does.

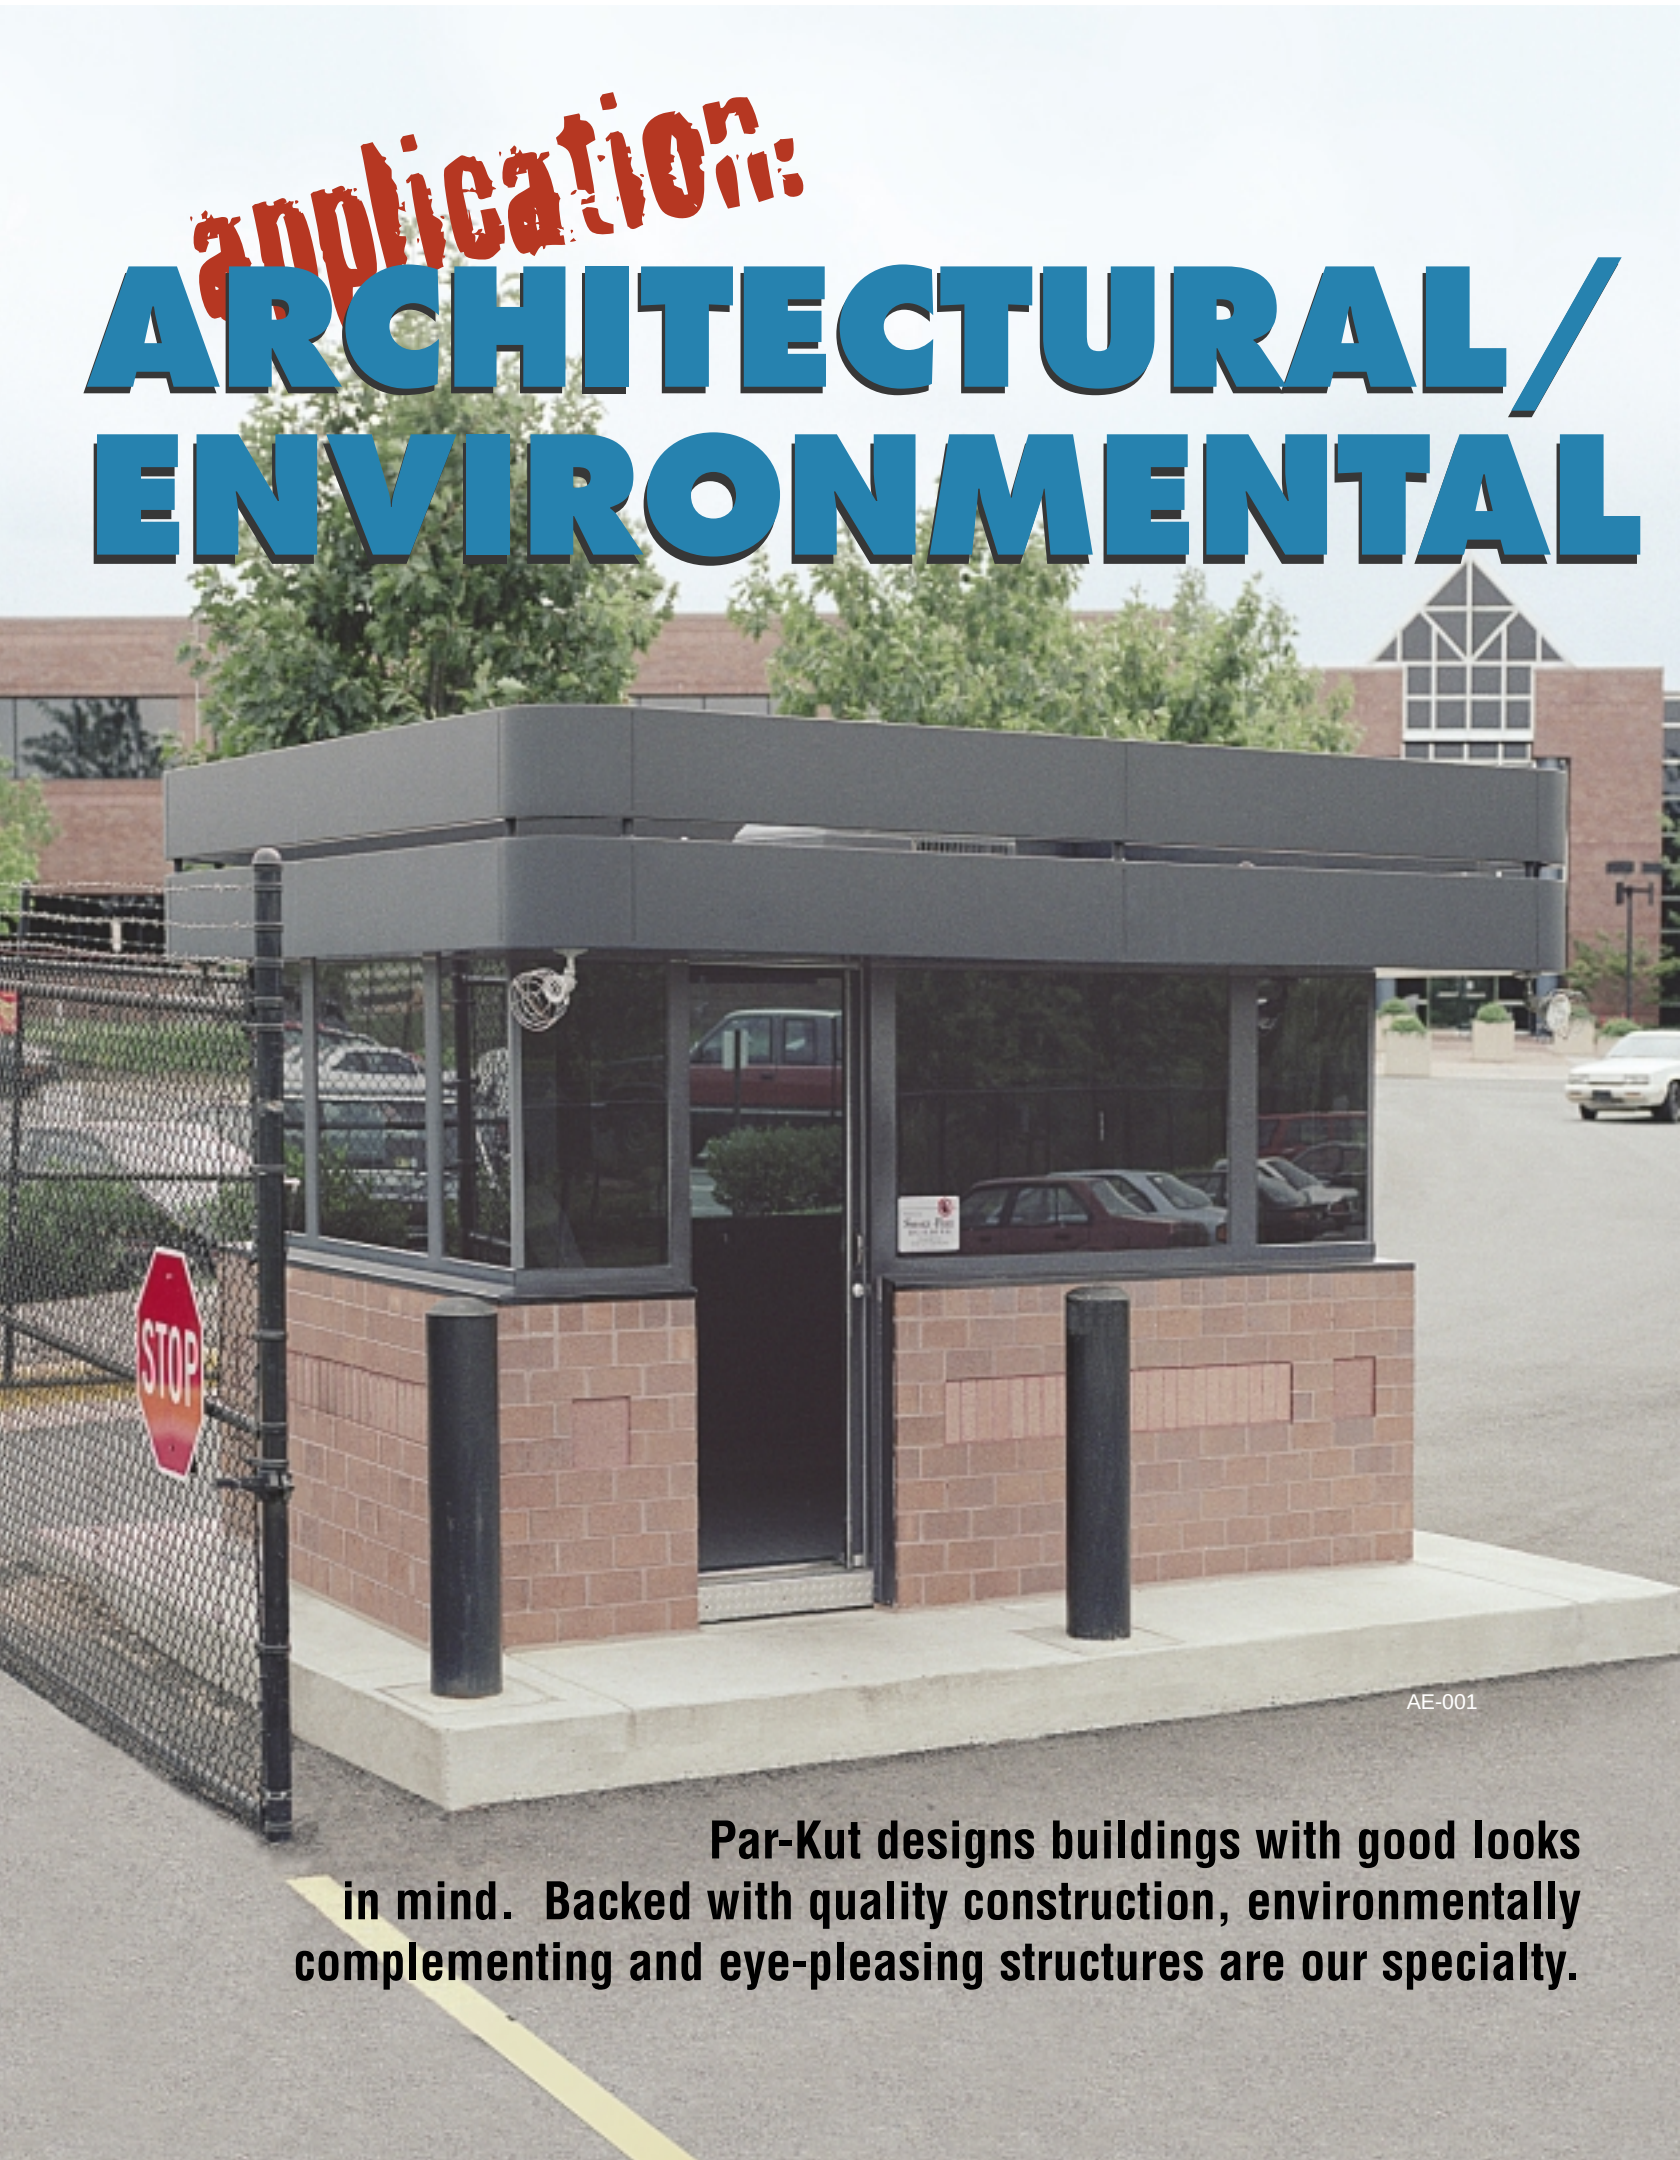
application:

ARCHITECTURAL/ ENVIRONMENTAL



AE-001

Par-Kut designs buildings with good looks in mind. Backed with quality construction, environmentally complementing and eye-pleasing structures are our specialty.

Attention to Aesthetics

As stewards for an attractive environment, Par-Kut has taken strides to develop features and fabrication techniques to make our booths complement the environment and/or existing architecture. A prevalent philosophy in architectural design is to incorporate free standing structures into the overall design scheme. Throughout the years. Par-Kut has remained cognizant of changing trends in architectural and site planning. Our designs have changed accordingly.

Through special facade applications, roof treatments, paint and graphic coordination and even customized structural design, Par-Kut produces portable steel buildings that border on architectural masterpieces. Likewise, buildings have been produced that enhance a particular urban or rural setting. The design staff at Par-Kut International works in conjunction with architects, contractors and developers to assure that the portable building is an intragral part of the site development and not an obtrusive add-on.

The entire Par-Kut team, is dedicated to making your building attractive, long lasting and functional.

application: CUSTOM

CUST-001

Par-Kut is the provider of unique steel buildings and enclosures. Our company specializes in providing viable solutions to almost any building application challenge. If Par-Kut hasn't built it yet . . . we will.

Any Form - Any Function

Par-Kut International has fulfilled more unique design and fabrication requests than any other portable steel building manufacturer. In recent years, extensive strides have been made in advancing metal fabrication technology. Staying abreast of industry changes has allowed Par-Kut to become more versatile in production techniques. From explosion proof industrial equipment shelters to contemporary trailered concession kiosks, Par-Kut has provided the solution to the unusual design challenge.

Regardless of the purpose or structural configuration, Par-Kut design engineers are qualified to transform your requirements to viable building plans for production. Often the custom built enclosure is the result of a need to complement architecture or serve as an addition to an existing structure. Often custom fabrication may be the use of exceedingly heavy gauge metal or a particular construction material to meet code requirements.

Regardless of the requirement, Par-Kut changes concepts to reality. If it can be moved by truck, we can build it.

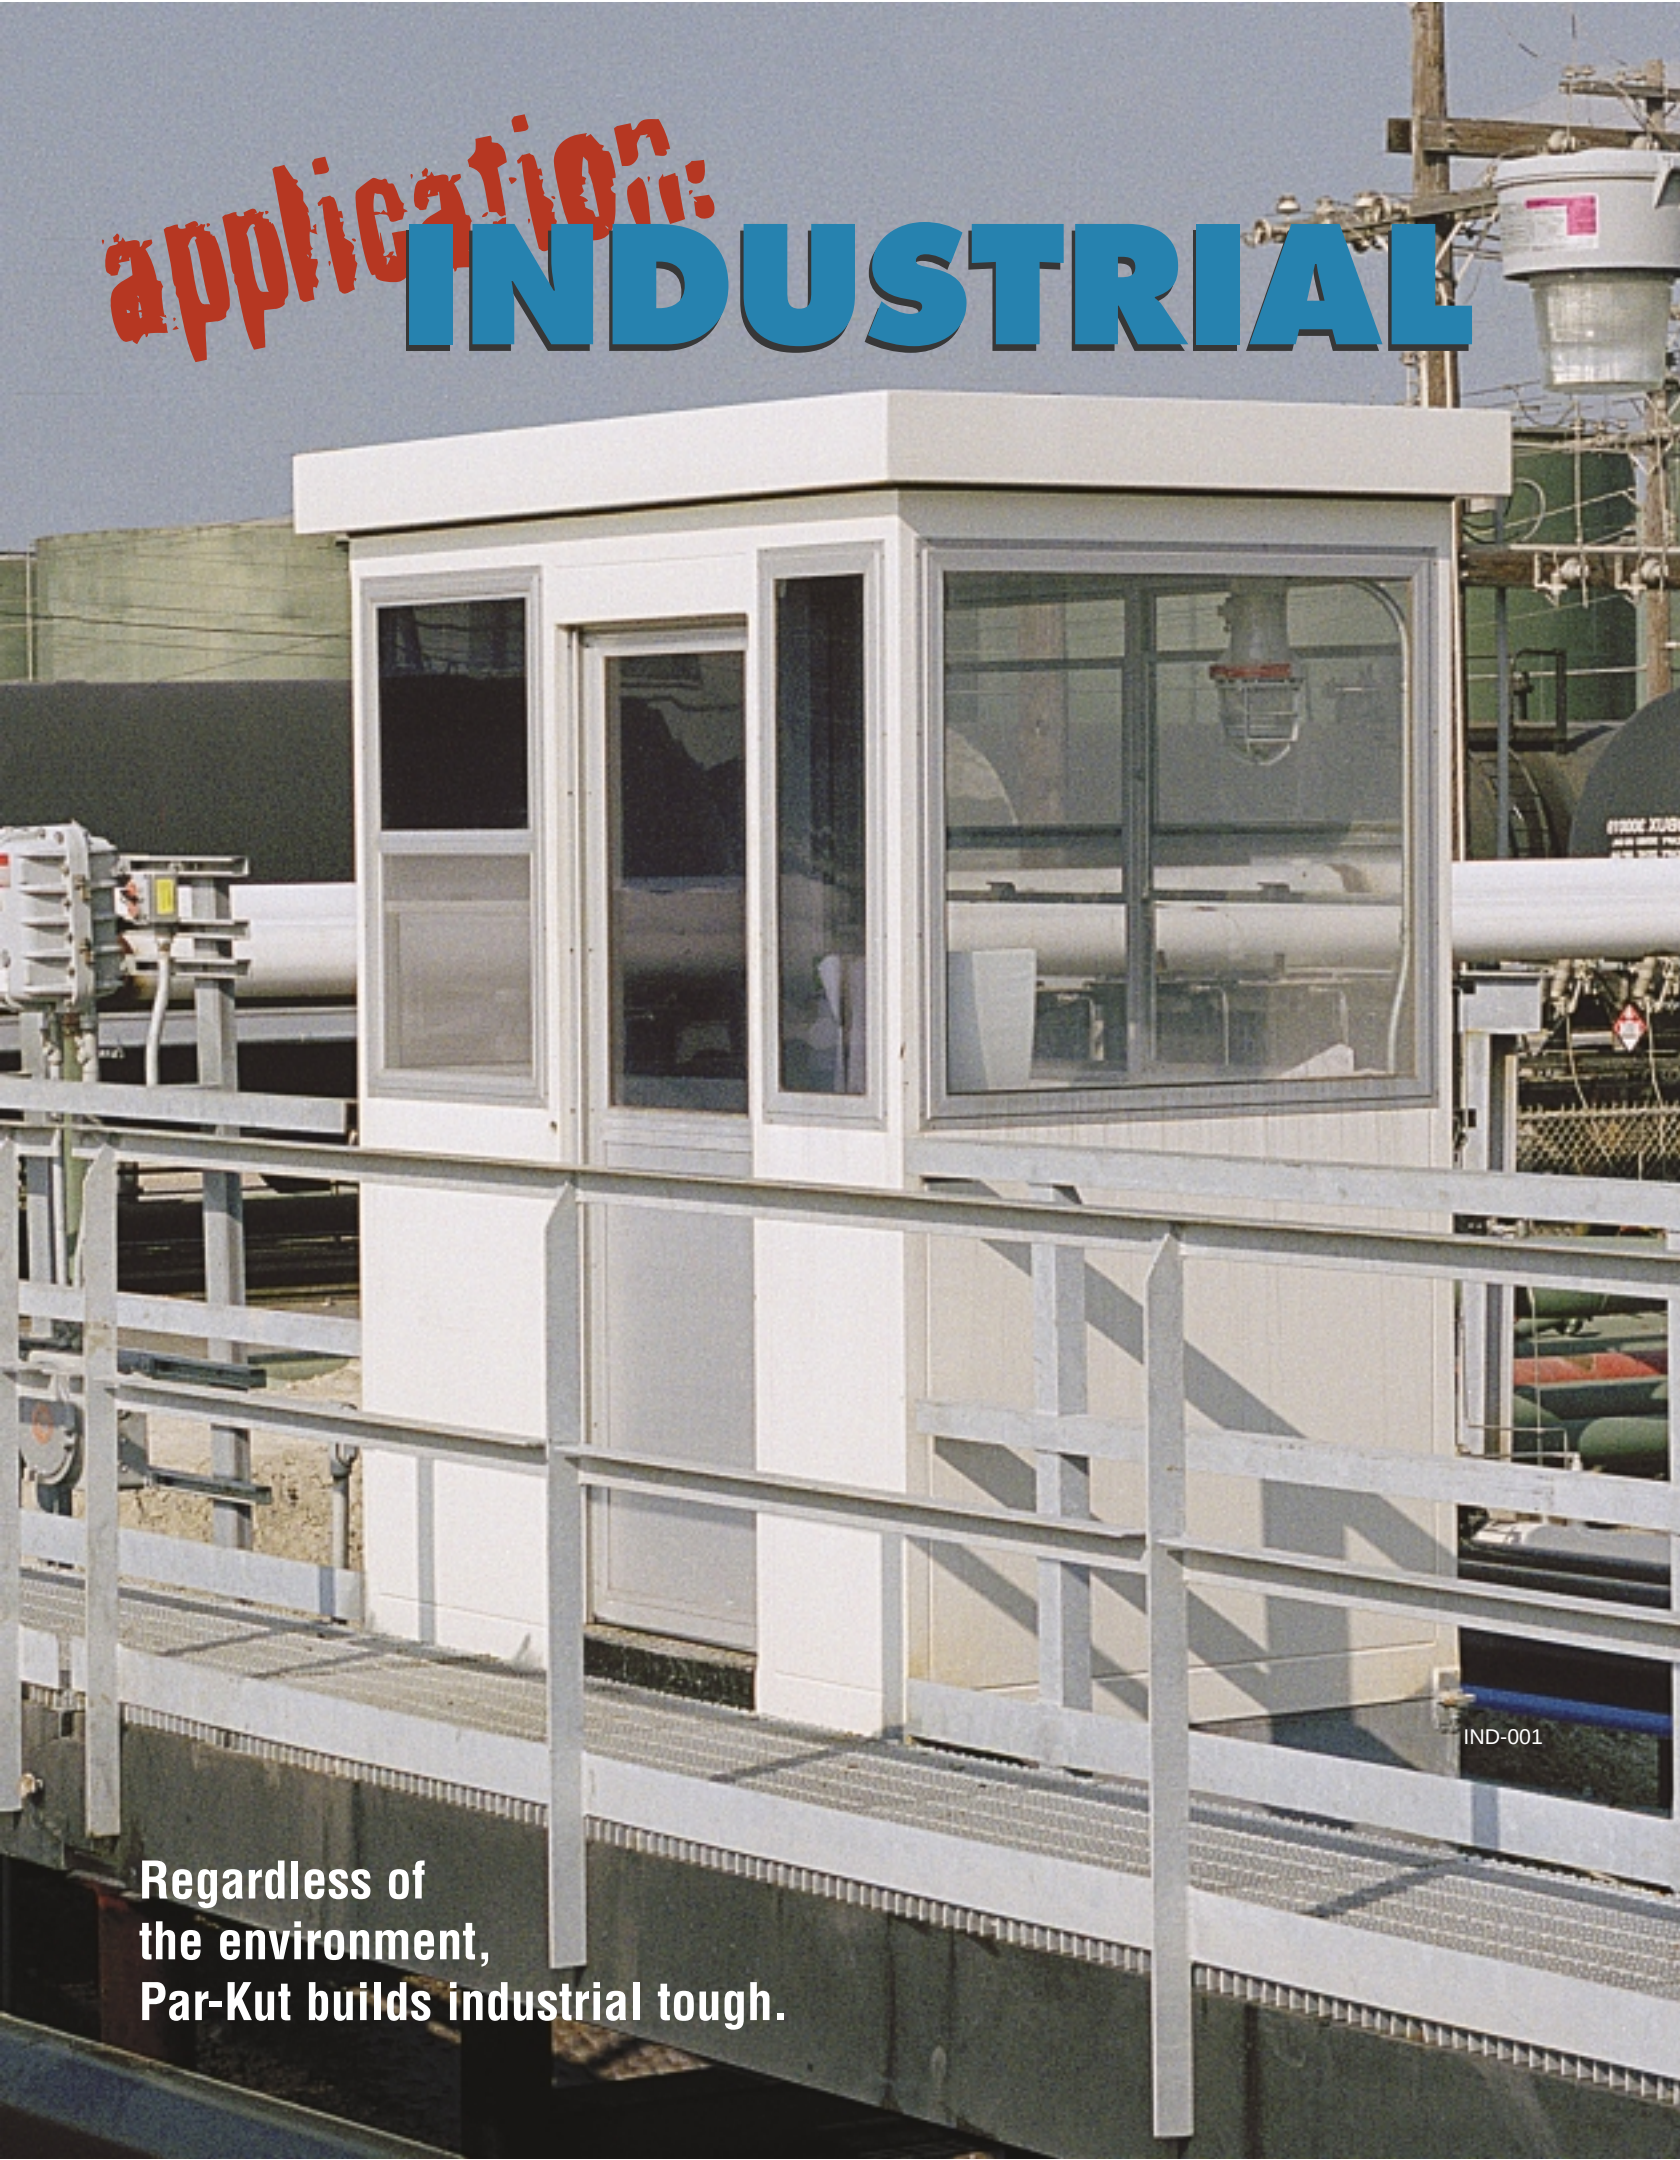
application: INDUSTRIAL



IND-001

Regardless of the environment, Par-Kut builds industrial tough.

Building Industrial Tough

Industrial applications are a Par-Kut forte'. Because every Par-Kut enclosure is overbuilt with durable long- lasting materials, they're a perfect fit for use in abusive industrial environments. Industrial booths don't get pampered so Par-Kut uses low-maintenance materials to make our buildings last and keep them looking good.

Safety and special purpose features are often required for industrial building applications. Par-Kut's partial list of options include electrical components, high voltage wiring and outlets, sloped windows for control booth applications, impact resistant sheet or unbreakable polycarbonate for windows and doors and epoxy or polyurethane finish paint for higher corrosion resistance.

Par-Kut buildings shelter industrial workers in gas docks, process control pulpits and in-plant offices, to mention a few. But we also build shelters for machinery, equipment and industrial inventory as well.

Par-Kut has built thousands of industrial booths and shelters - and we've built them well.

application: SHELTERS

SHLT-001

Par-Kut's versatile and good-looking transit, waiting and smoke shelters are always in demand.

Durable & Long Lasting Protection

Par-Kut offers fully enclosed, preassembled shelters for every application. Versatile transit, waiting and smoke shelters are all steel welded construction and available in various sizes - 5' x 14' being standard. Each single unit shelter is complete with top-hung sliding doors, heat and insulation and vandal resistant lights. All colors are available. Ventilation systems and benches are optional.

Par-Kut's rugged, custom designed shelters meet any specification or design requirement. Custom shelters often include unique roofs to compliment environment or existing architectural designs.

An economical alternative to preassembled shelters is Par-Kut's aluminum site-erected shelter. Available in eight sizes, it features anodized aluminum frame, sloped translucent fiberglass roof, all tempered safety glass windows and aluminum kick panels. Colors are limited. All fasteners and instructions provided.

Don't go helter-skelter in search of a shelter, call Par-Kut now.

Par-Kut portable steel buildings have been approved for use in a majority of the states with modular/ commercial structure building programs, and have been accepted for use within jurisdictions that have adopted model codes published by ICBO, BOCA,, ICC, SBCCI.

Where required, Par-Kut can accommodate additional local building department design requirements, such as coastal wind, mountain snow loads, or unusual seismic loads at additional cost, if not already covered by a state label program.
