

THE PARK & REC TRADES Company Spotlight

Par-Kut Prefabricated Steel Buildings

Fulfilling Park & Recreational Applications

Par-Kut International is a Michigan corporation that has been manufacturing prefabricated portable steel buildings for the parks and recreation industry and virtually every other industry since 1954. These application specific buildings are built to strict specifications and delivered nationwide and even worldwide.

Par-Kut offers what we call our "STANDARD" line of booths that will fit most general project applications. Projects requiring an architecturally enhanced version may select from the "PRESIDENTIAL", "PARVUE", "CENTRY", and "CURVUE" product lines. (See examples: www.parkut.com) Those unique situations that demand an architectural enhancement outside of the product lines offered can rely on Par-Kut's experienced employees and their capabilities to design and fabricate that totally Custom unit.

Uses Include: Campground Contact Stations, Dock or Harbor master Offices, Golf Course Starter Booths, Guardhouses, Booths (Ticket, Parking Cashier, Security, Inspection, Toll, and Information), Valet buildings, Shelters (Passenger, Bus, Shuttle, Transit, Smoking, Spectator, and Attendant), In-Plant Offices, Concession Stands, Sally Port Check Point Shelters, Equipment Sheds, APM (Automatic Pay Machine) Enclosures, Canopies and more.

Producing buildings that meet specific needs require specific accessories and Par-Kut offers an unlimited myriad of available options. Some of the most common options are:

- * Custom exteriors: Stone finishes, raised architectural panels, two-tone paint, face brick, ready-for-brick (or stone) at site treatments, cedar siding, and custom graphics.
- * Custom roof treatments: extra width fascias, larger canopy overhangs, hip or gable style standing seam metal roofs, mansard, shingled, etc.)
- * Cashier windows: Slide-up, side-sliding or energy saving trap door style. Partial or full height.
- * Locking cash drawers or drop safes.
- * Transaction drawers, intercoms, walk-up ticket windows (speak through tubes).
- * Glazing: tinted, insulated, laminated, low-e or spandrel glass, unbreakable polycarbonate, impact resistant acrylic sheet, and bullet resistant material.
- * Painted doors and windows to match or contrast with exterior finish.
- * Additional insulation in walls and floor for severe weather areas.
- * Downlights, interior recessed lights, fluorescent lighting under canopy, floodlights and dimmable interior lighting.
- * Extra electric outlets, GFI and surge protected plugs, plug strips.
- * Plastic laminate or stainless steel countertops, additional shelves.
- * Steel sliding or swinging doors, dutch doors, hydraulic closers, storefront doors.
- * 3/4" plywood and: tile, sheet vinyl or carpet; anti-fatigue mat floors.
- * Air conditioners: roof mount or through wall, combination heat/cool units, and heat pumps.
- * Fans, louvers and screened windows for ventilation.
- * Time clock alleys, walk-through areas, closets, restrooms.
- * Security screens, burglar bars, roll-up shutters.
- * Slanted ends, angled observation windows, full height glass.
- * Round, octagon, or other custom shapes, custom ceiling heights.
- * Stainless steel corrosion barrier base, doors and structures.

All buildings can be designed to meet ADA-compliance, Bullet Resistant protection (all levels) to be on Trailers, Stands, Tower or include a Built-In restroom.

The quality of all Par-Kut creations are reflected by the single unit welded galvanized steel used throughout the buildings. Using the highest quality products available is why there are Par-Kut buildings that have been in service longer than some of the competitors have been in business! And the service doesn't stop after the sale. Par-Kut has an in-house parts department that works with and supply's customer's products to keep their buildings functioning properly for many years.

Every Par-Kut building that leaves the plant has a factory installed UL certified electrical system, and a durable polyurethane paint finish in your choice of color. All buildings are delivered locally via flat bed truck and are easily off loaded by the customer by using a fork lift truck or the supplied lifting rings welded into the roof. International orders can be crated, or loaded into shipping containers.

A call to Par-Kut International can turn your concept into reality, on-time and within budget.
