

INDUSTRIAL SECURITY

Par-Kut all steel welded security buildings are a key component at security checkpoints and strategic points of entry - worldwide!

Seen in both industrial and governmental applications, Par-Kut gate houses, inspection booths and gun or surveillance towers outlast any other portable building because they're overbuilt to withstand any physical or environment abuse - almost indefinitely!

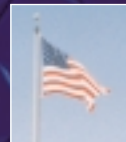

In addition to bullet resistant construction up to levels UL 8 and NIJ 4, the Par-Kut list of security options is endless.

Regardless of the size, design or application requirement, a Par-Kut portable steel building delivers comfort, security and durability.
