

PAR-KUT INTERNATIONAL

SECURITY BOOTH

CUSTOM SECURITY BUILDINGS

Par-Kut works with security professionals, architects and owners to customize solutions for their location's specific needs. Whether it's a truck gate, an employee entrance, a parking area, or a high security facility needing a perimeter security observation post, Par-Kut has the experience and capabilities to design and build the perfect guard shelter or access control point. Our security booths can include restrooms for 24/7 operations, increased space for additional personnel, raised platforms and even trailer mounting. The process is straight forward - customers start with a standard floor plan and modify to suit. Then, the Par-Kut factory builds to order and ships complete.

BULLET RESISTANT SECURITY OPTIONS

Standard Par-Kut buildings provide excellent protection from the elements and have been engineered to meet the harshest climates and even hurricanes. However, some locations demand additional protection in the form of bullet resistant construction. Par-Kut provides guard shelters and security booths with walls, doors and windows of hardened materials to provide bullet resistant protection for the occupants. Buildings can have a standard appearance or can be architecturally enhanced. Options include the level of ballistic protection needed, gun ports, sliding or swinging doors, camera preps, exterior lights, and more.

Level	Weapon	Ammunition	Velocity	Shots
Level I (MPSA)	9 mm	124 Grain Full Metal Jacket	1175-1295 (FT./SEC)	3
Level II (HPSA)	.357 Magnum	158 Grain Soft Point	1250-1375 (FT./SEC)	3
